The numbers show the number of pages published in each issue of Gamma. For example, in G07, 8.8 pages was a translation. The column "Gray" shows the percentage of printable part of the magazine which contained something. 100 - Gray is the percentage of papers left blank. In no 22 we, by mistake, published something which was published already, so there are 11 pages of "Redundant" in G22, and fortunately never before or after that.

**The graph is printed in the next page of this document.**
